

FEATURES

- Wide Angle Sensors
- Trigger point set at factory to 25°
- Analog output
- Range: 4 to 30 cm
- Response Time: 20.2 Max.
- Response time: 16.5 Typ.
- Typical response time: 16.5 ms
- Typical start up delay: 21.2 ms

DESCRIPTION

The GP2Y3A001K0F is a distance measuring sensor with integrated signal processing and analog voltage output.

Figure 1. Pinout

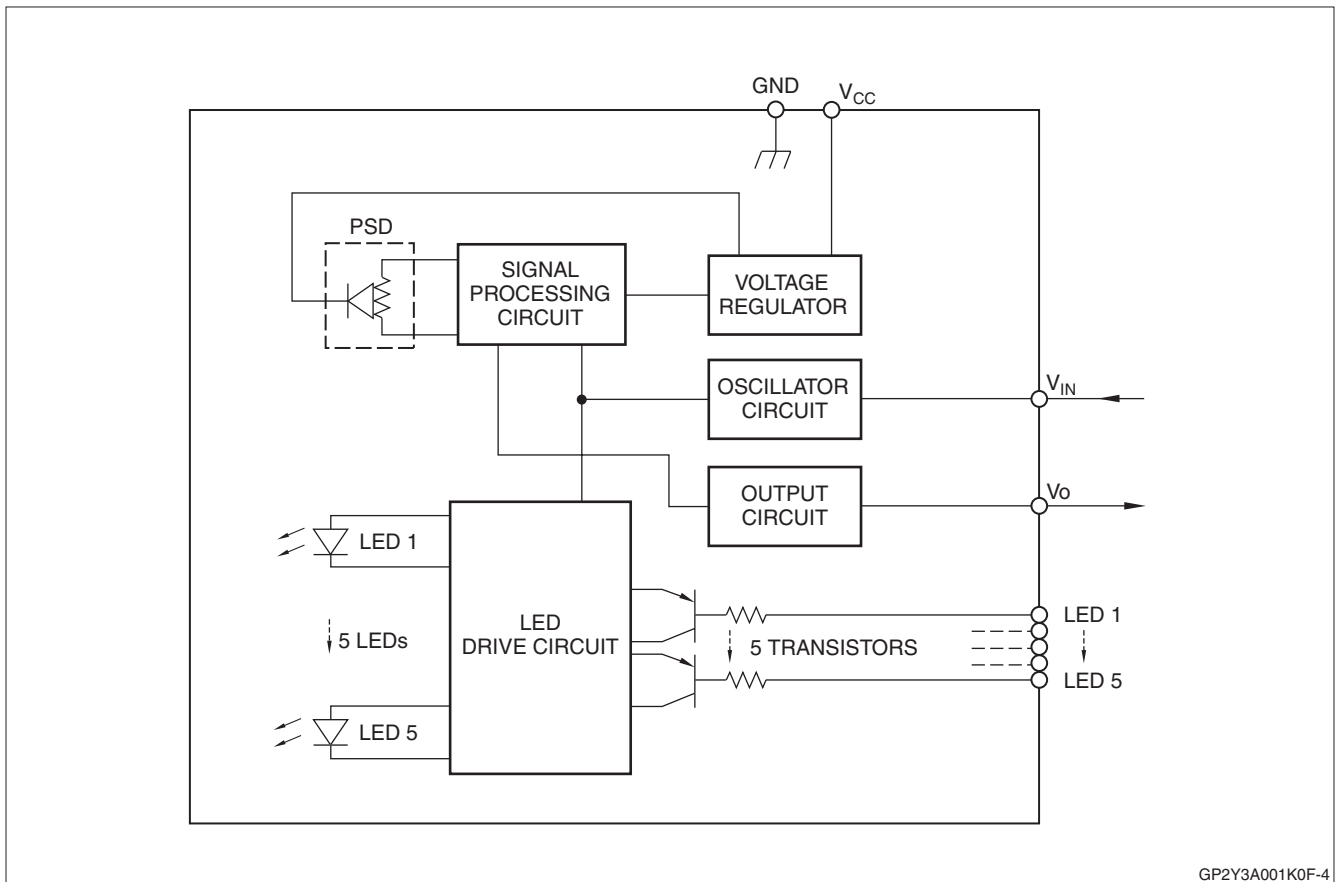

Figure 2. Block Diagram

ELECTRICAL SPECIFICATIONS**Absolute Maximum Ratings**

$T_a = 25^\circ\text{C}$, $V_{CC} = 5\text{ VDC}$

PARAMETER	SYMBOL	RATING	UNIT
Supply Voltage	V_{CC}	-0.3 to +7.0	V
Output Terminal Voltage	V_O	-0.3 to ($V_{CC} + 0.3$)	V
Input Voltage	V_{IN} , LED 1 to LED 5	-0.3 to ($V_{CC} + 0.3$)	V
Operating Temperature	T_{opr}	-10 to +60	$^\circ\text{C}$
Storage Temperature	T_{stg}	-40 to +70	$^\circ\text{C}$

Operating Supply Voltage

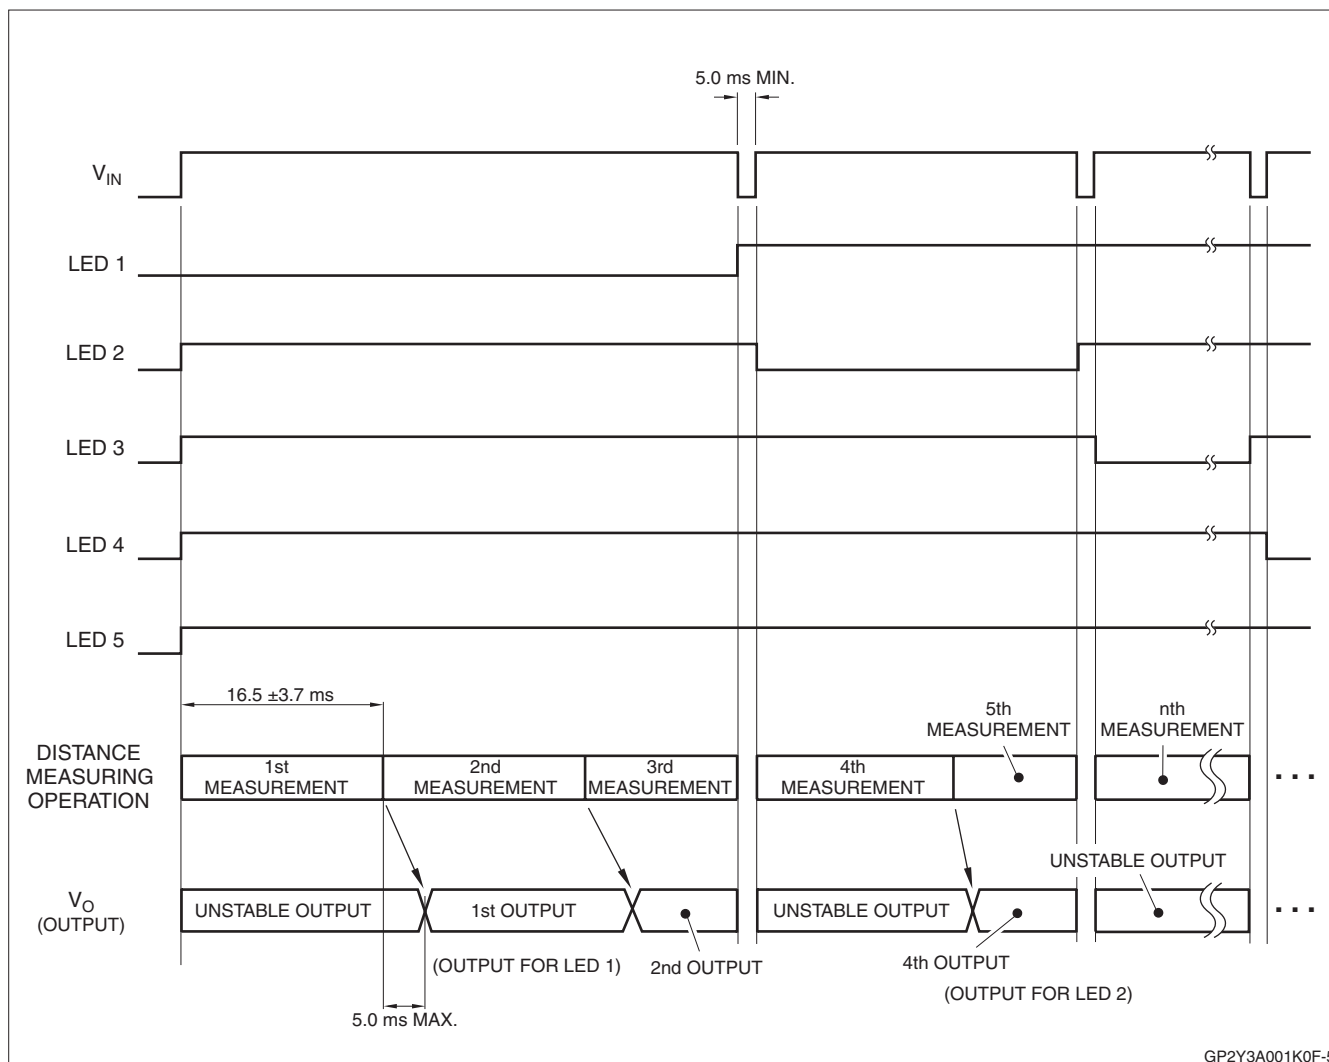

PARAMETER	SYMBOL	RATING	UNIT
Operating Supply Voltage	V_{CC}	4.5 to 5.5	V

Electro-optical Characteristics**DISTANCE MEASURING SENSOR**

PARAMETER	SYMBOL	CONDITIONS	MIN.	TYP.	MAX.	UNIT
Measuring Distance Range	ΔL	(Note 1)	40	—	300	mm
Output Terminal Voltage	V_O	$L = 300\text{ mm}$ (Note 1)	(A-0.3)	(A)	(A+0.3)	V
Output Voltage Gap	ΔV_O	Output voltage gap between $L = 85\text{ mm}$ and $L = 40\text{ mm}$ (Note 1)	(B-0.3)	(B)	(B+0.3)	V
Input Voltage	$V_{IN\ H}$	Input voltage for operating distance measuring sensor	4.5	—	—	V
	$V_{IN\ L}$	Input voltage for turning off distance measuring sensor	—	—	0.3	V
	LED H	Input voltage for turning LED OFF	4.5	—	—	V
	LED L	Input voltage for turning LED ON	—	—	0.5	V

NOTES:

1. Measurements made with Kodak R-27 Gray Card, using the white side, (90% reflectivity).
2. L = Distance to reflective object
3. The voltage value of A and B is TBD.

PACKAGE SPECIFICATIONS

PACKING SPECIFICATION

PART NAME	MATERIAL
Packing case	Corrugated cardboard
Pad	Corrugated cardboard
Tray	Polystyrene

PACKING METHOD

1. Each tray holds 50 pieces. Packing methods are shown in (A).
2. Each box holds 10 trays. Pads are added to top and bottom, and between layers, as in (B). top and bottom. Put pads between each tray (9 pads total) see above drawing (B).
3. The box is sealed with packing tape. (C) shows the location of the Model number, Quantity, and Inspection date.
4. Package weight: Approximately 4 kg.

GP2Y3A001K0F-8

NOTES

- Keep the sensor lens clean. Dust, water, oil, and other contaminants can deteriorate the characteristics of this device. Applications should be designed to eliminate sources of lens contamination.
- When using a protective cover over the emitter and detector, ensure the cover efficiently transmits light throughout the wavelength range of the LED ($\lambda = 850 \text{ nm} \pm 70 \text{ nm}$). Both sides of the protective cover should be highly polished. Use of a protective cover may decrease the effective distance over which the sensor operates. Ensure that any cover does not negatively affect the operation over the intended application range.
- Objects in proximity to the sensor may cause reflections that can affect the operation of the sensor.
- Sources of high ambient light (the sun or strong artificial light) may affect measurement. For best results, the application should be designed to prevent interference from direct sunlight or artificial light.
- Using the sensor with a mirror can induce measurement errors. Often, changing the incident angle on the mirror can correct this problem.
- If a prominent boundary line exists in the surface being measured, it should be aligned vertically to avoid measurement error. See Figure 5 for further details.
- When measuring the distance to objects in motion, align the sensor so that the motion is in the horizontal direction instead of vertical. Figure 6 illustrates the preferred alignment.
- A 10 μF (or larger) bypass capacitor between V_{CC} and GND near the sensor is recommended.
- To clean the sensor, use a dry cloth. Use of any liquid to clean the device may result in decreased sensitivity or complete failure.
- Excessive mechanical stress can damage the internal sensor or lens.

NOTICE

The circuit application examples in this publication are provided to explain representative applications of SHARP devices and are not intended to guarantee any circuit design or license any intellectual property right. SHARP takes no responsibility for any problems related to any intellectual property right of a third party resulting from the use of SHARP devices.

SHARP reserves the right to make changes in the specifications, characteristics, data, materials, structures and other contents described herein at any time without notice in order to improve design or reliability.

Contact SHARP in order to obtain the latest device specification sheets before using any SHARP device. Manufacturing locations are also subject to change without notice.

In the absence of confirmation by device specification sheets, SHARP takes no responsibility for any defects that occur in equipment using any SHARP devices shown in catalogs, data books, etc.

The devices listed in this publication are designed for standard applications for use in general electronic equipment. SHARP's devices shall not be used for or in connection with equipment that requires an extremely high level of reliability, such as military and aerospace applications, telecommunication equipment (trunk lines), nuclear power control equipment and medical or other life support equipment (e.g. Scuba). SHARP takes no responsibility for damage caused by improper use of device, which does not meet the conditions for use specified in the relevant specification sheet.

If the SHARP devices listed in the publication fall within the scope of strategic products described in the Foreign Exchange and Foreign Trade Law of Japan, it is necessary to obtain approval to export such SHARP devices.

This publication is the proprietary product of SHARP and is copyrighted, with all rights reserved. Under the copyright laws, no part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical for any purpose, in whole or in part, without the express written permission of SHARP. Express written permission is also required before any use of this publication may be made by a third party.

Contact and consult with a SHARP representative if there are any questions about the contents of this publication.
