

# UTC78MXX LINEAR INTEGRATED CIRCUIT

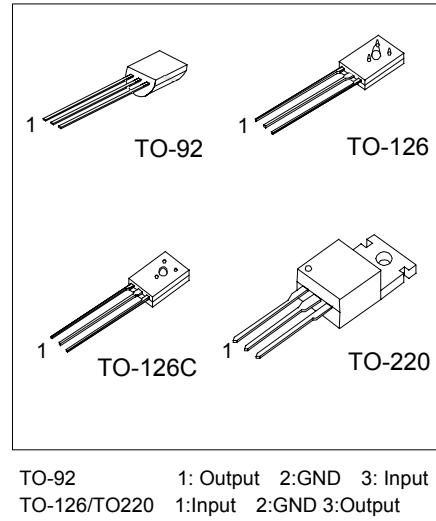

## 3-Terminal 0.5A Positive Voltage Regulator

### DESCRIPTION

The UTC 78MXX family is monolithic fixed voltage regulator integrated circuit. They are suitable for applications that required supply current up to 0.5 A.

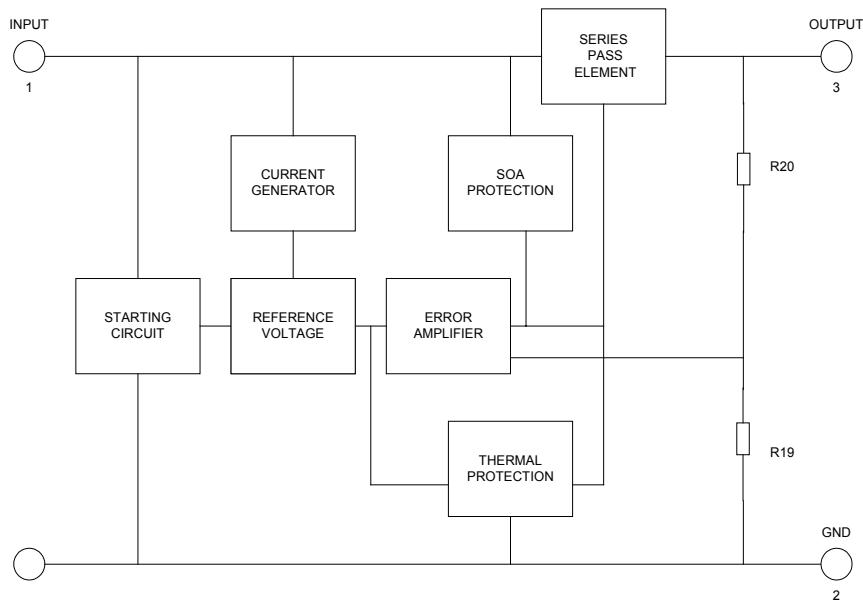

### FEATURES

- \*Output current up to 0.5 A
- \*Fixed output voltage of 5V, 6V, 8V, 9V, 12V, 15V, 18V and 24V available
- \*Thermal overload shutdown protection
- \*Short circuit current limiting
- \*Output transistor SOA protection

\*Pb-free plating product number: 78MXXL

### TEST CIRCUIT

Note 1: The Maximum steady state usable output current are dependent on input voltage, heat sinking, lead length of the package and copper pattern of PCB. The data above represents pulse test conditions with junction temperatures specified at the initiation of test.

Note 2: Power dissipation<0.5W

# **UTC78MXX**      LINEAR INTEGRATED CIRCUIT

## APPLICATION CIRCUIT

Note 1: To specify an output voltage, substitute voltage value for "MXX".

Note 2: Bypass capacitors are recommended for optimum stability and transient response and should be located as close as possible to the regulators.
