ADJUSTABLE OUTPUT VOLTAGE REGULATORS IN 8-PIN TO-3 CASE

Device	Output Voltage (Volts)		Input Voltage (Volts)		Output Current Amps (Max)	NOTES
	Min	Max	Min	Max		
CJCA 001	+ 8	+ 56	10	60	5.0	ADJUSTABLE VOLTAGE REGULATORS
CJCA 002	+ 8	+ 56	-10	-60	5.0	1. Adjustable voltage regulators from the case. 2. CJCA 007 and CJCA 008 provide regulation, current limiting capability, short circuit protection with the addition of an external resistor network. Constant current source for current mode regulation is built in. 3. CJCA 001 and CJCA 002 require an external transistor resistor for regulation and current limiting.
CJCA 007	+ 8	+ 56	10	60	5.0	
CJCA 008	+ 8	+ 56	-10	-60	5.0	

NOTES

FIXED VOLTAGE REGULATORS -- 3 Amp and 5 Amp Version

- Specified output voltage limits are met within the voltage-current boundaries indicated under Line Regulation and Load Regulation.
- V_{OUT} tolerance at $+25^{\circ}\text{C}$ = $\pm 5\%$.
- All regulators have foldback current limiting and short circuit protection.
- Typical knee current (current foldback point) is:

I _{OUT}	
3A	5A
I _{KNEE}	
4.5A	8.0A

- Typical short circuit current is 0.5 Amps -- Hybrid short circuit current values are available upon request.
- Ripple rejection = 55 db min.
 I (quiescent) = 50 ma max.
 $^{\circ}\text{JC} = 1^{\circ}\text{C/W}$ typical.
- Standard Package: Case is Vin; Pin 1 is vout; Pin 2 is ground.
- Optional Package: Case is Vin; Pin 1 is ground; Pin 2 is vout.

Ordering Information: Part numbers listed in table are for standard configuration; for optional configuration add suffix R to part number listed in the table (i.e. CJSE 039R).

For space savings, multiple regulators can be supplied in a common copper flatpack.

Output voltages from $\pm 2\text{V}$ to $\pm 50\text{V}$ available upon request.

Higher currents up to 50A available in copper flatpacks.
