PD057VU7

1. Application

This data sheet applies to a color TFT LCD module, PD057VU7.
PD057VU7 module applies to OA product, car TV (must use Analog to Digital driving board), which requires high quality flat panel display. If you must use in severe reliability environment, please don't extend over PVI's reliability test conditions.

2. Features

. QVGA (320*240 pixels) resolution
. Module with resistive type touch panel
. Amorphous silicon TFT LCD panel with LED
. Pixel in stripe configuration
. Thin and light weight
. Display Colors：262,144 colors
. TTL interface

3. Mechanical Specifications

Parameter	Specifications	Unit
Screen Size	5.7 (diagonal)	inch
Display Format	320×(R,G,B)×240	dot
Display Colors	262,144	
Active Area	115.20 (H)×86.4 (V)	mm
Pixel Pitch	0.36(H)×0.36(V)	mm
Pixel Configuration	Stripe	
Outline Dimension	144(W)×104.6 (H)×14.45 (D) (typ.)	mm
Weight	244±10	g
Back-light	36-LED	
Surface treatment	Anti-glare + SWV	
Display mode	Normally white	
Surface treatment of Touch Panel	3H	
Gray scale inversion direction	6 o`clock [ref. to Note 13-1]

6-3) Durability Performance

1. Hitting Durability:

   At least 1,000,000 times with R8.0mm silicon rubber, 250g, 3 times/sec.

2. Sliding Durability:

   At least 1,00,000 times with R0.8mm polyacetal stylus, 250g, 60 mm/sec.

6-4) Integration Design Guide

Avoid the design that Front-case overlap and press on the active area of the touch-panel.
Give enough gap (over 0.5mm at compressed) between the front case and touch-panel to protect wrong operating.
Use a buffer material (Gasket) between the touch-panel and front-case to protect damage and wrong operating.
Avoid the design that buffer material overlap and press on the inside of touch-panel viewing area.

14. Handling Cautions

14-1) Mounting of module
  a) Please power off the module when you connect the input/output connector.
  b) Polarizer which is made of soft material and susceptible to flaw must be handled carefully.
  c) Protective film (Laminator) is applied on surface to protect it against scratches and dirts.
  d) Please following the tear off direction as figure 14-1 to remove the protective film as slowly as possible, so that electrostatic charge can be minimized.

14-2) Precautions in mounting
  a) When metal part of the TFT-LCD module (shielding lid and rear case) is soiled, wipe it with soft dry cloth.
  b) Wipe off water drops or finger grease immediately. Long contact with water may cause discoloration or spots.
  c) TFT-LCD module uses glass which breaks or cracks easily if dropped or bumped on hard surface. Please handle with care.
  d) Since CMOS LSI is used in the module. So take care of static electricity and earth yourself when handling.

14-3) Adjusting module
  a) Adjusting volumes on the rear face of the module have been set optimally before shipment.
  b) Therefore, do not change any adjusted values. If adjusted values are changed, the specifications described may not be satisfied.

14-4) Others
  a) Don`t expose the module to direct sunlight or intensive ultraviolet rays for many hours.
  b) Store the module at a room temperature place.
  c) The voltage of beginning electric discharge may over the normal voltage because of leakage current from approach conductor by to draw lump read lead line around.
  d) If LCD panel breaks, it is possibly that the liquid crystal escapes from the panel. Avoid putting it into eyes or mouth. When liquid crystal sticks on hands, clothes or feet. Wash it out immediately with soap.
  e) Observe all other precautionary requirements in handling general electronic components.
  f) Please adjust the voltage of common electrode as material of attachment by 1 module.

14-5) Polarizer mark

The polarizer mark is to describe the direction of wide view angle film how to match up with the rubbing direction.
